

At last, dogs and grass can coexist

HYBRID DOG TURF

Natura® works with nature

Natura is not like any other outdoor dog yard ground cover. Natura hybrid turf is 50% perforated to allow real grass and vegetation to grow through - and once it does grow through, Natura protects that plant from the wear of dog paws.

Where Natura really earns its keep is on the high-traffic zones of the yard - covering the old worn area.

Natura hybrid turf allow you to have all of the healthy benefits of natural grass for your dogs, with the added protection of a turf.

BENEFITS OF HYBRID

Protects Grass In Dog Play Yards

Covers High-Paw-Traffic Areas

Less expensive than traditional turf

naturaturfpro.com

TURF. REIMAGINED.

For multifamily, dog parks and
dog day care applications

Features & Benefits:

Covers muddy areas - perfect for gate areas or your entire dog exercise yard

Real grass grows through the patent-pending turf - add grass seed for even better results

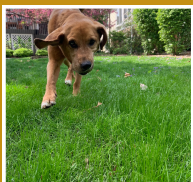

Requires minimal cleaning - allows liquids to easily pass through

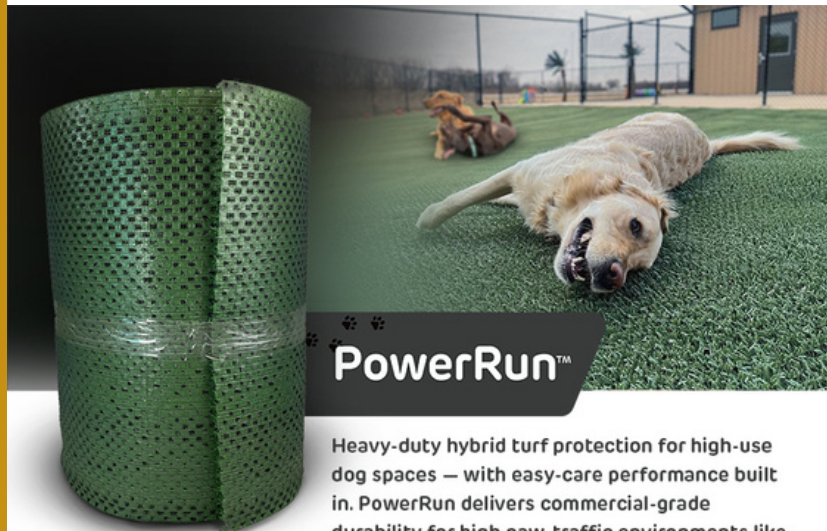

Does not retain odors or get hot to the touch

Easy to install and maintain - no additional tools or machinery required

Minimizes anxiety in dogs - they can smell and engage with earth through Natura

PowerRun™

Heavy-duty hybrid turf protection for high-use dog spaces — with easy-care performance built in. PowerRun delivers commercial-grade durability for high paw-traffic environments like dog parks, daycares, and shared pet amenities.

PlayZone™

Natural-look hybrid turf protection for lower-use dog spaces. PlayZone offers proven odor control, breathability, and maintenance simplicity for lighter paw-traffic areas like residential yards and boutique pet businesses.
